

# PanKind 2021 Grant Program Innovation Grant Application Instructions

## Innovation Grant: Early Detection

Funding available: \$100,000 grant for 1 year

## Innovation Grant: Early Detection with a focus on Rural and Regional areas

Funding available: \$100,000 grant for 1 year

Through this grant, PanKind aims to help address the disparity between major cities, and rural and regional areas.

“Pancreatic cancer survival rates are lower in rural areas when compared with major cities and the burden of pancreatic cancer in Aboriginal and Torres Strait Islander populations is high. Poor pancreatic cancer outcomes in rural areas are thought to be related to reduced access to diagnostic services and specialist oncology services.”
